Your Trusted Mission Partner

Serving National Security, Public Safety and Healthcare Sectors

Why USmax:

- Award winning - SBA Certified Women-Owned Small Business (WOSB)
- Mission focused, zero-debt company
- Over 120 successful federal prime contracts and task orders executed to include large and small business as subcontractors
- An established and proven PMO delivering OCONUS Hi-threat and Austere environment deployments worldwide
- We develop and apply best-practice standard operating procedures for repeatability and dependability; reducing costs
- DCAA approved accounting system

Our commitment to better serve our customers and drive value by offering “game changing” solutions is the inspiration behind **USmax iLab**. iLab is a combination of:

- Emerging technologies with the latest and most optimum hardware and software applications needed to innovate
- Our ability to invent, innovate and improve solutions offers our clients significant benefits for reducing costs, yielding more robust designs, and shortening the cycle times of new product development

Success Stories:

For the **FEMA Office of Response and Recovery** the **USmax iLab** evaluates **service containerization** of cloud hosted **AWS ESRI ArcGIS Enterprise** for future use in production operations during National Disasters.

For a **Department of Commerce** agency, **USmax iLab** innovated, tested and implemented a virtual environment in an enterprise **Network Operations Center (NOC)**. Our solution provided the agency the ability to rapidly test and deploy cost effective solutions to the community.

One of the largest provider of durable medical equipment (DME) in the Mid-Atlantic region relied on **USmax iLab** to develop a **Logistics Route and Scheduling** optimization solution to efficiently distribute medical equipment. The experts at **USmax iLab** innovated a routing algorithm utilizing the **TourSolver Software Development Kit (SDK)** from **Magellan Ingénierie**. The innovation resulted in a three-fold increase in capacity to deliver equipment, with no increase in resources or operations.
